Document Archiving Solutions

Document Archiving solutions are an inevitable tool to help businesses and organizations save logistics costs, optimize human resource efficiency, and substantially speed up business processes by converting physical business documents into digital records that can be electronically archived, proficiently managed, and easily accessed.

DAS-Document Archiving Solution

Using **OCR** and **MCR** technologies, all correspondence, contracts, printed office documents, faxes, and letters can be converted into digital, searchable formats like MRC-compressed PDFs or JPGs —streamlining data access, archiving, and secure processing.

DAS-Document Archiving Solution has the following state-of-the-art features.

Unlimited user logins

User Access Control

AD Authentication

scanner Integration

ERP Integration

Multiple Search

Secure file sharing

Url Encryption

Share document with any one
